

**The Clinical Research Unit (CRU) is part of the Lady Davis Institute for Medical Research
SMBD at the Jewish General Hospital.**

The CRU is amongst the leading clinical research units in Canada for Phase I and II clinical trials in oncology and malignant hematology. With 50 team members, the CRU is recognized internationally and is considered for very impactful and important phase I and II trials by larger pharma.

The CRU's mission is to provide innovative therapies to patients with limited therapeutic options, and at the same time, to contribute to the clinical development of new therapies that change the outlook for all patients with life-threatening illnesses.

Beside the compassion, the efficiency, and the unique care provided to the patients, the CRU makes a point to foster the development and the growth of our qualified personnel.
